# Interceptus

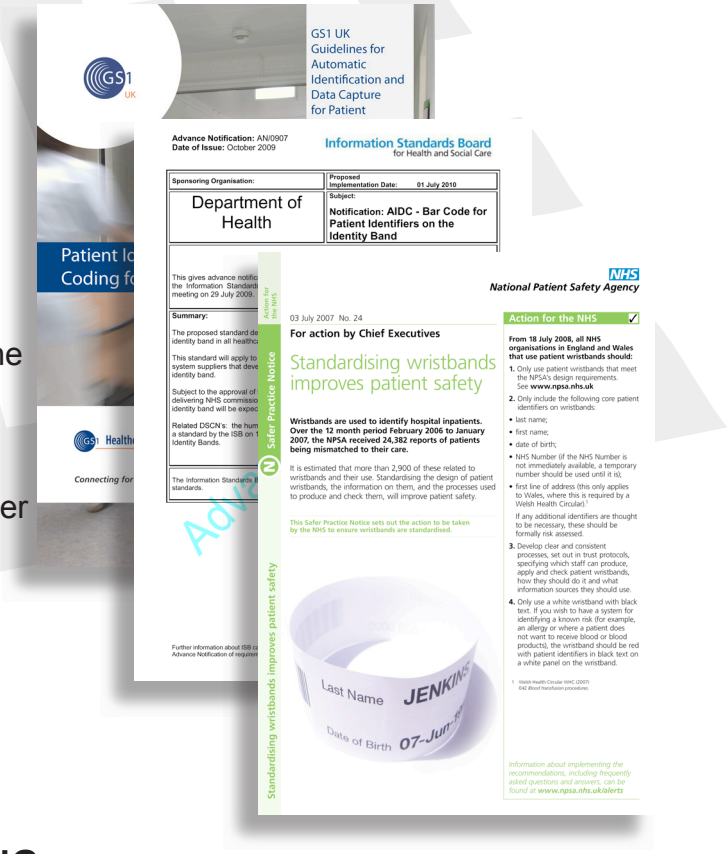
## BEAT THE JULY 2011 DEADLINE:

**AN 0907 Notification: AIDC - Bar Code for Patient Identifiers on the Identity Band.**

*"...The procedures and processes required by the standard will ensure that patients can be identified by auto-identification and data capture (AIDC) techniques thus reducing risks of misidentification, improving patient safety and improved patient care...."*

**Interceptus is designed to:**

- Meet SPN24 and AN 0907
- Convert print outputs from Legacy and current PAS systems.
- Print GS1 compliant barcodes.
- Allow adoption of GS1 1D barcodes now and give the flexibility to change immediately to 2D codes in the future with no new software.
- Print small barcodes on baby wristbands
- Print on media with multiple orientations such as laser sheets or multi part labels.
- Help PAS administrators frustrated by their current reporting and layout tools.



## TAKE CONTROL OF WRISTBAND PRINTING

**Interceptus prints barcoded wristbands and labels. Intended for use with all Patient Demographic Systems. Offering flexible data input by intercepting your current print jobs it lets you control the final output.**

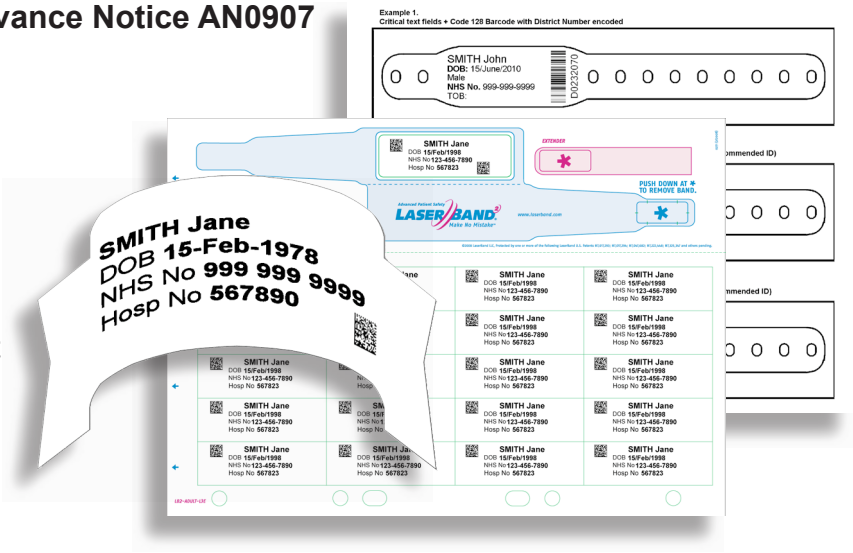
# Interceptus

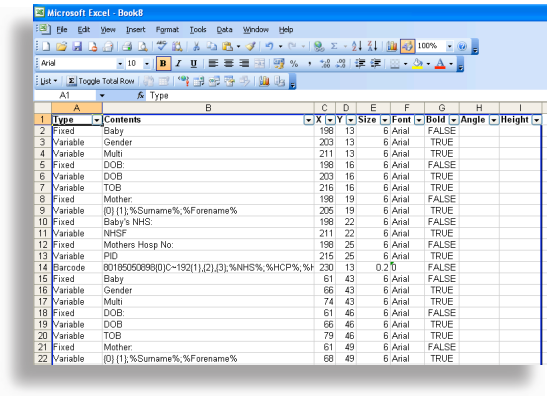
## Interceptus prints wristbands to meet:

- **National Patient Safety Agency SPN24**
- **NHS Information Standards Board Advance Notice AN0907**
- **GS1 Standards**
- **Local specific requirements**



### Automatically handles:

- Case formating of Surname and Forename
- Formating NHS Numbers to 3-3-4 format
- Formating dates to DD-MMM-YYYY format
- Generating GS1 compliant barcodes
- GS1 128 1D linear code
- GS1 Datamatrix 2D code



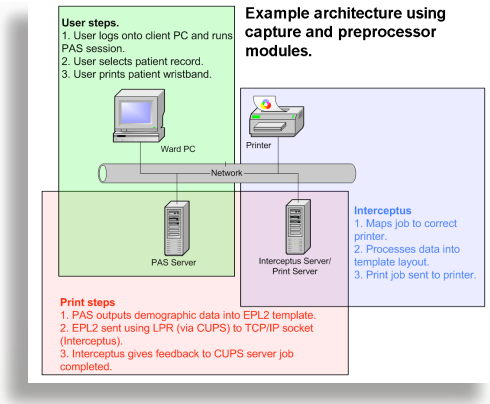
### Flexible template design:

- Can be designed and edited by end users and managed centrally.
- Accurate positioning of text and barcode data.
- 2D and 1D barcodes can be used in the same template and can be switched easily.
- Multiple orientation, font sizes and formatting available.

### Adaptable data input:

Interceptus can intercept your existing print jobs including:

- EPL, ZPL, PCL and plain text (subject to parsing)
- Print jobs can be redirected and intercepted locally (on client PCs) or centrally via a network print server.
- Dozens of printers can be handled including multiple media types, templates and even a mixed estate of different brands of printer.
- Customisation is available to offer complete flexibility subject to individual requirements and constraints.



**Example architecture using capture and preprocessor modules.**

### Technical Requirements:

Operating system:
Microsoft Windows XP
Microsoft Windows 7
Microsoft Windows 2003 Server
Microsoft Windows 2008 Server

Microsoft .NET Framework 3.5 SP1 or higher
Windows drivers for all print hardware.

### Barcode Symbologies:

One Dimensional:
Code 128
GS1 128

Two Dimensional:
ECC 200 Datamatrix
GS1 Datamatrix

GS1 UK

BSI UKAS
ISO9001 FM01006
